

Installation Instructions for Tight Jointing

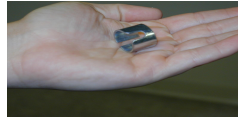

PARTS NEEDED FOR INSTALLATION, INCLUDED

THREADED INSERTS

THREADED ROD

INSERT

Step 1

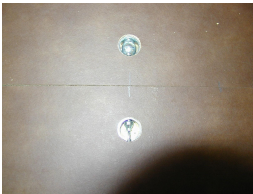

Install the **THREADED INSERTS** along left side into circular cutouts.

Step 2

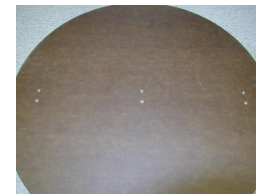

Screw **THREADED ROD** into the insert approximately 1/2".
The flat finger grip needs to end up in an upright position.

Step 3

Slowly slide the table halves together making the **THREADED ROD** insert into the circular cutout on the right half.
Then install the **INSERT** into the circular cutout on the right half of the table over the **THREADED ROD**.

Step 4

Use the **TIGHTENING TOOL** to turn the **THREADED INSERTS** to bring the table halves tightly together.

NOTE: Because the tables are jointed together it is important to always handle the tops with care so as not to disrupt the tight joint.
